## February 2015 Beeline

February celebrations often feature Valentine's Day and since Mead is the ancient wine of Love it's a natural companion to this special day. Did you know the very term "honeymoon" comes from the ancient tradition of giving bridal couples a moons worth of honey wine?

Our very unique Iced Mead is made with a special distillation process that concentrates the rich honey flavour into a potent elixir. In Frosted Blisssss, Mazer Art Andrews has perfected this even further with the added blend of several of your favourite berries. Sweet, silky smooth and sumptuous, it's the perfect ending to any dinner- or the perfect beginning of a romantic one...

If you are planning a romantic evening we have the perfect recipe for romance! It's included in our [February Beeline](#), as well as more news, and other updates from the honey farm.
